Locastic

Who we are

Locastic is an innovative design and development team with more than a decade of experience in transforming creative business ideas into decentralized digital products.

Award-winning software team specialized in design, web and mobile app development.

30+ **highly skilled** programming experts, at your service.

Developing **custom web3 solutions** in an agile environment.

Building custom software for **international clients** since 2011.

Blockchain Experts

Discovery & Strategy

We collect and analyze data in order to understand business goals and project scope.

UI/UX Design

We create modern and attractive interfaces to attract new customers with flawless functionalities.

Blockchain Development

Since it's inception, we have developed secure Solidity smart contracts, launched NFT and Metaverse campaigns and built enterprise-level DeFi projects.

Locastics

IN THEIR NATURAL HABITAT, MAKING EVERYONE HAPPY ❤️ SINCE 2011

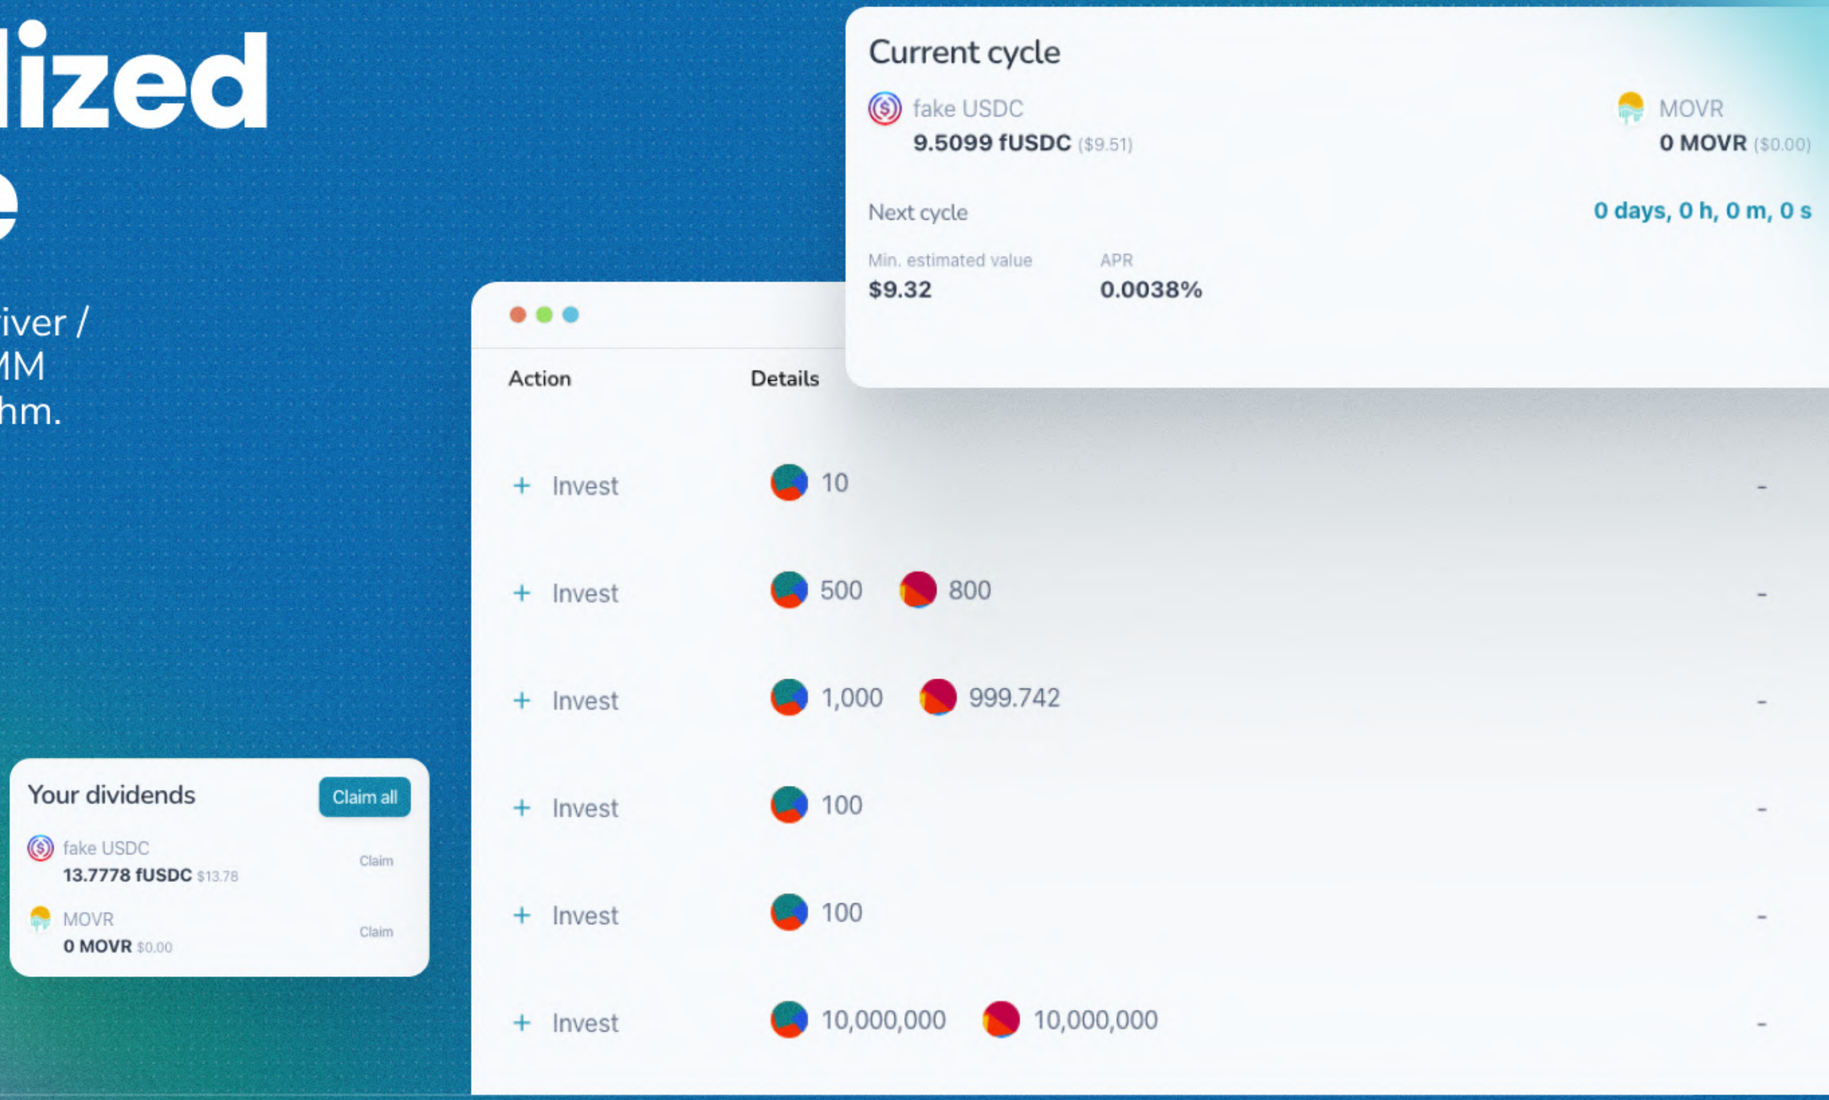
BURA

Decentralized Exchange

Exchange platform built on Moonriver / Moonbeam network. Based on AMM (automatic market making) algorithm.



Swap

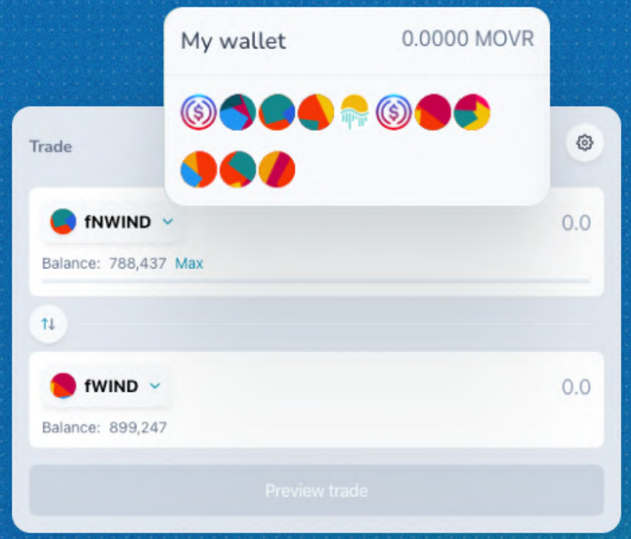
Exchange tokens based on liquidity pools.

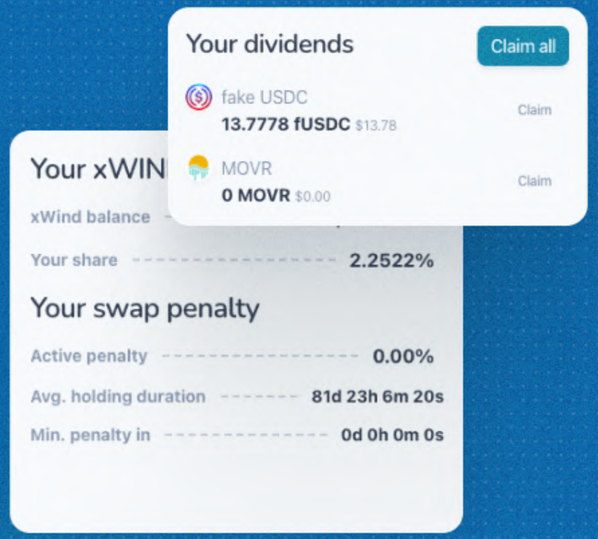
Dividends

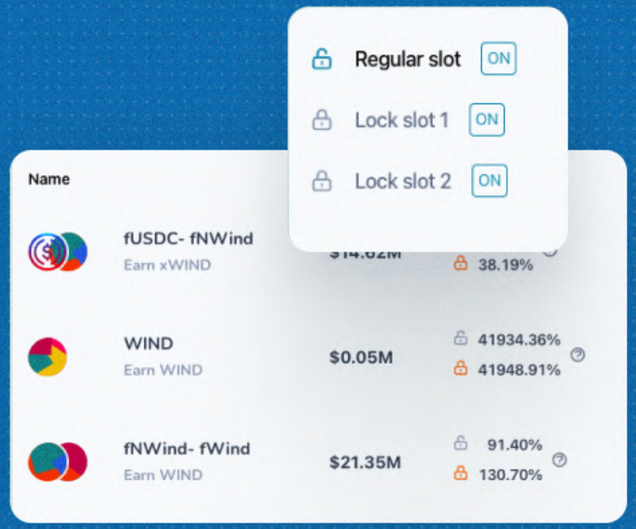
Rewards for holding the xWIND token, incentive for user to hold the xWIND in order to receive dividends in form of tokens (in this case MOVR and USDC)

Farms

You can lock your tokens to the farm and get reward in protocol farm token (in this case xWIND)

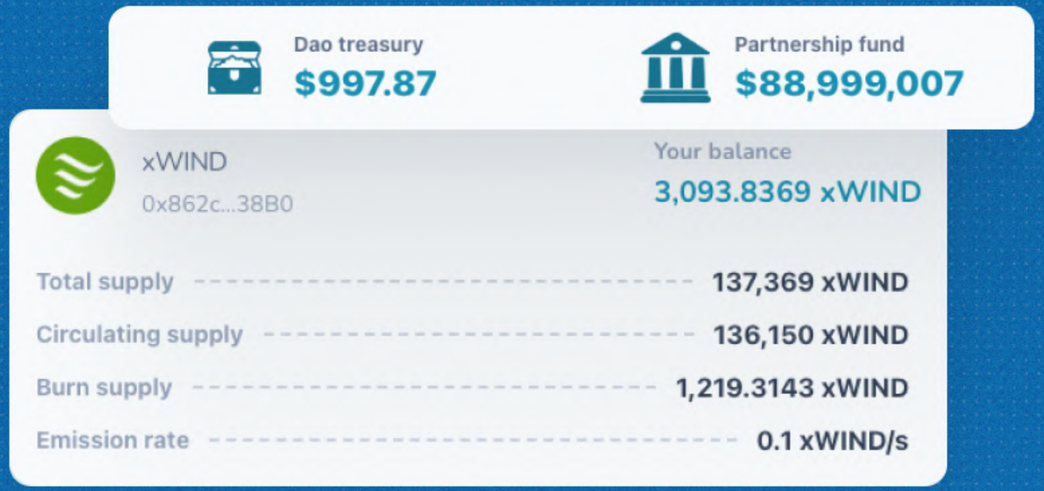






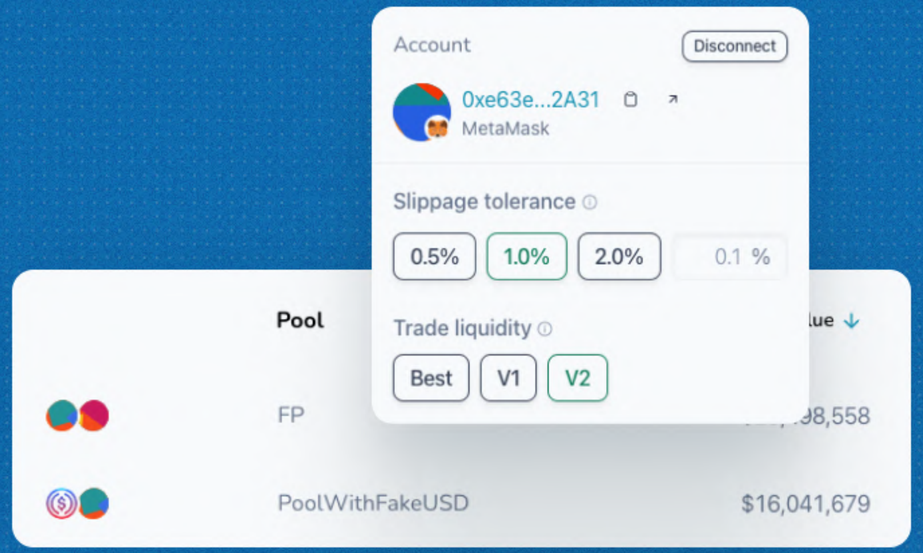
Info

Protocol information such as total value locked, WIND and xWIND price, circulating supply etc



Pools

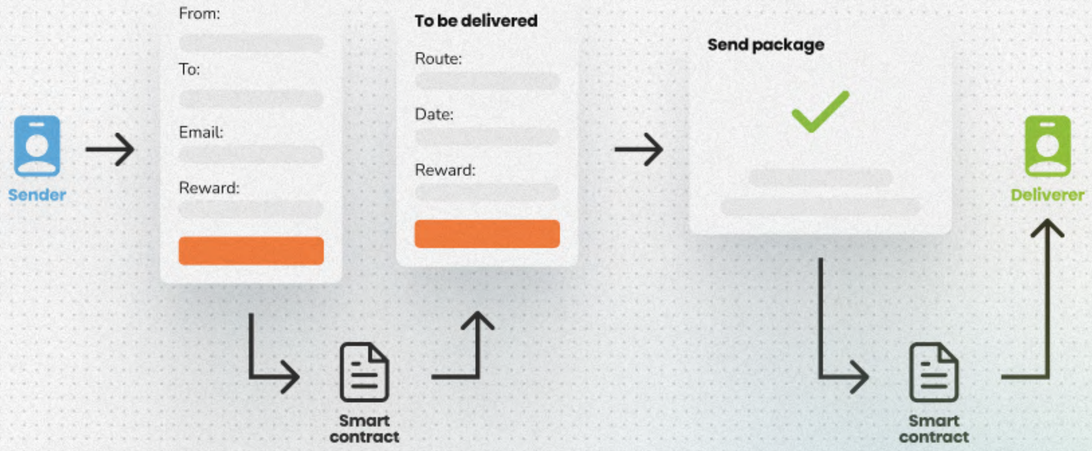
Provide liquidity by creating various pools or have the option to invest in one of the pools; eventually receiveing yield rewards.

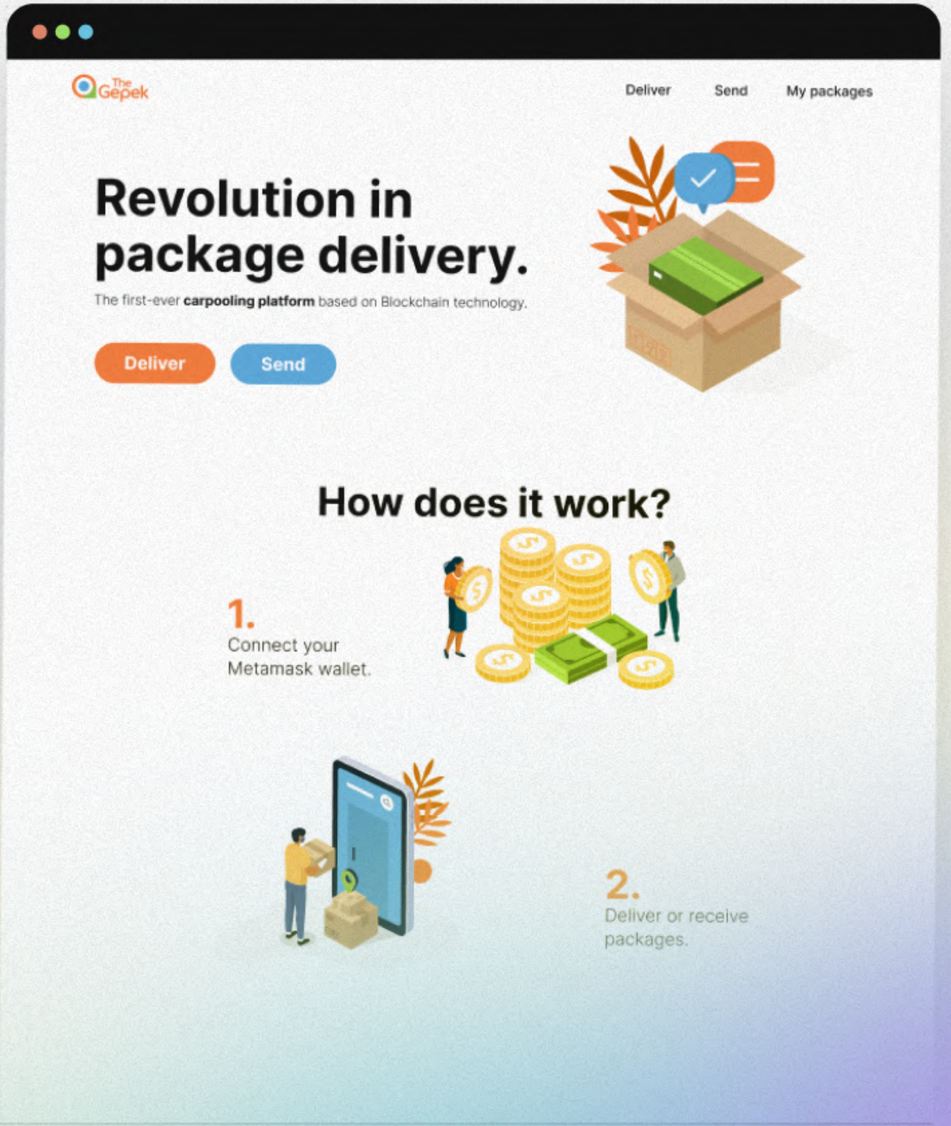


The Gepek

Carpooling for packages

Blockchain platform that offers a way to gain income while driving or sending packages.

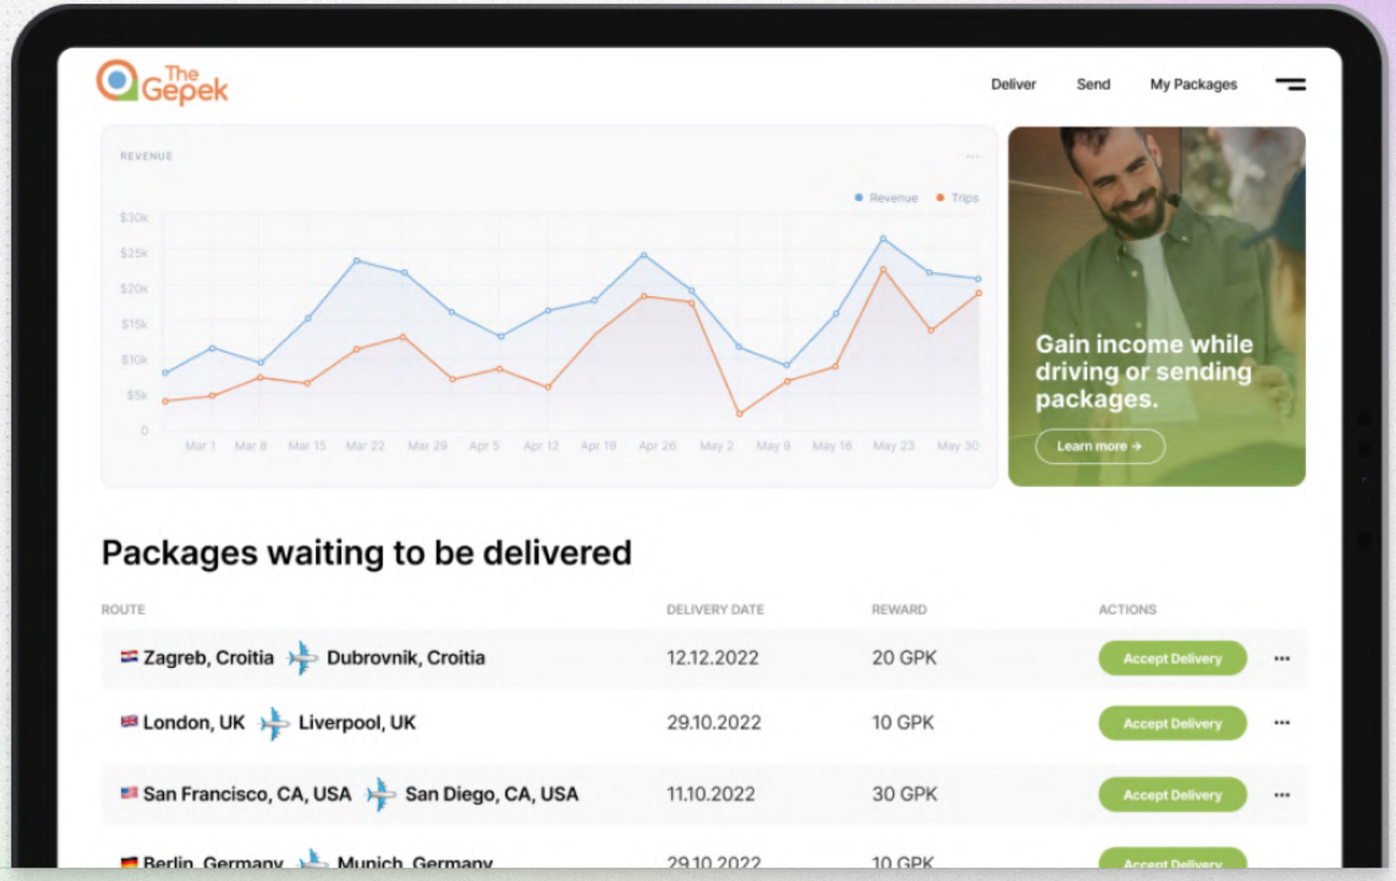




How does it work?

After TheGepek users open the application, they can view packages that are currently waiting to be delivered, or choose the option to submit the package for future delivery.

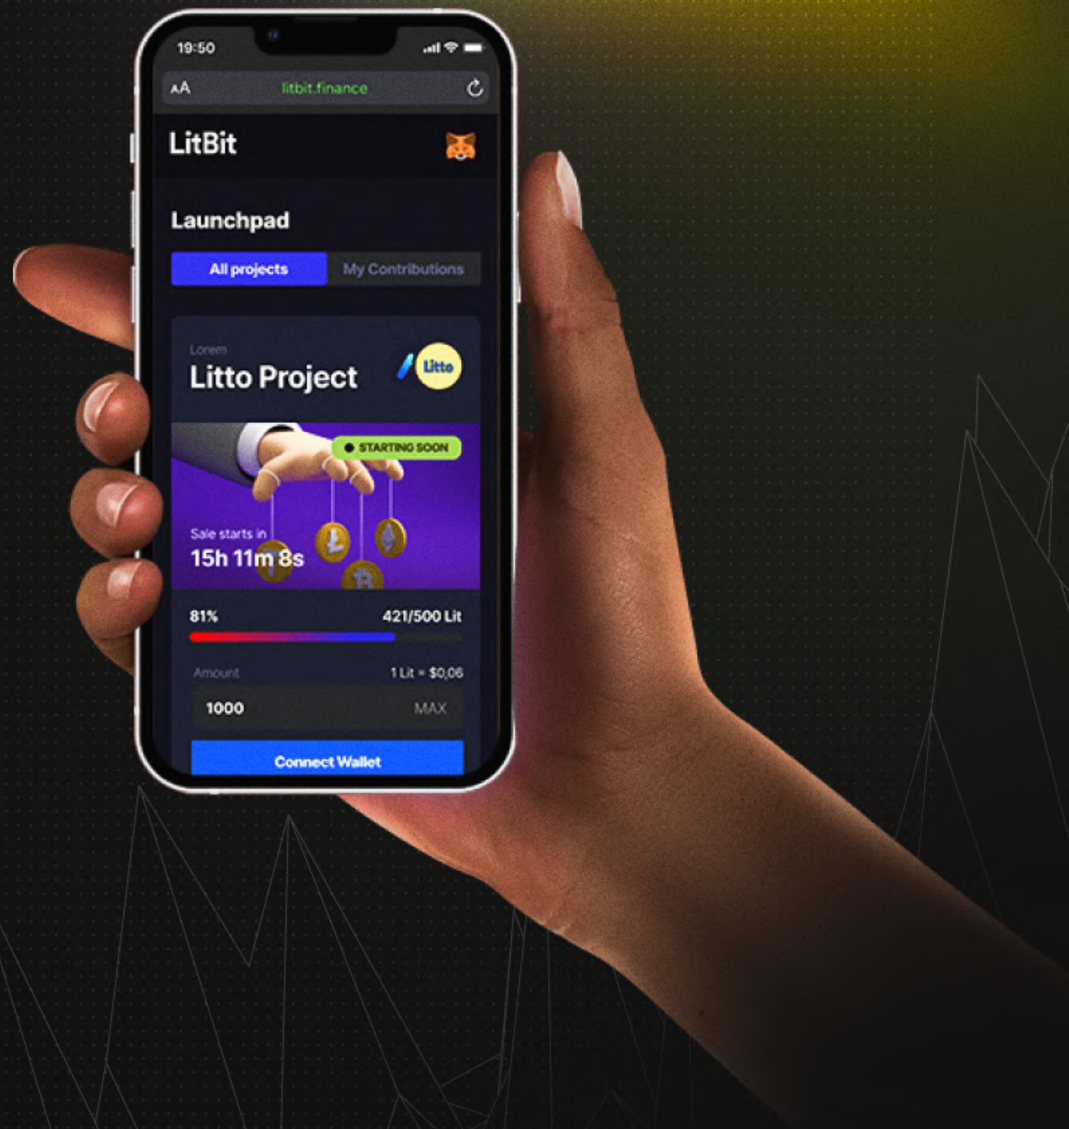
Once they log in with their smart wallet, that will simulate creating their user profile and allow interaction with the app.



LitBit

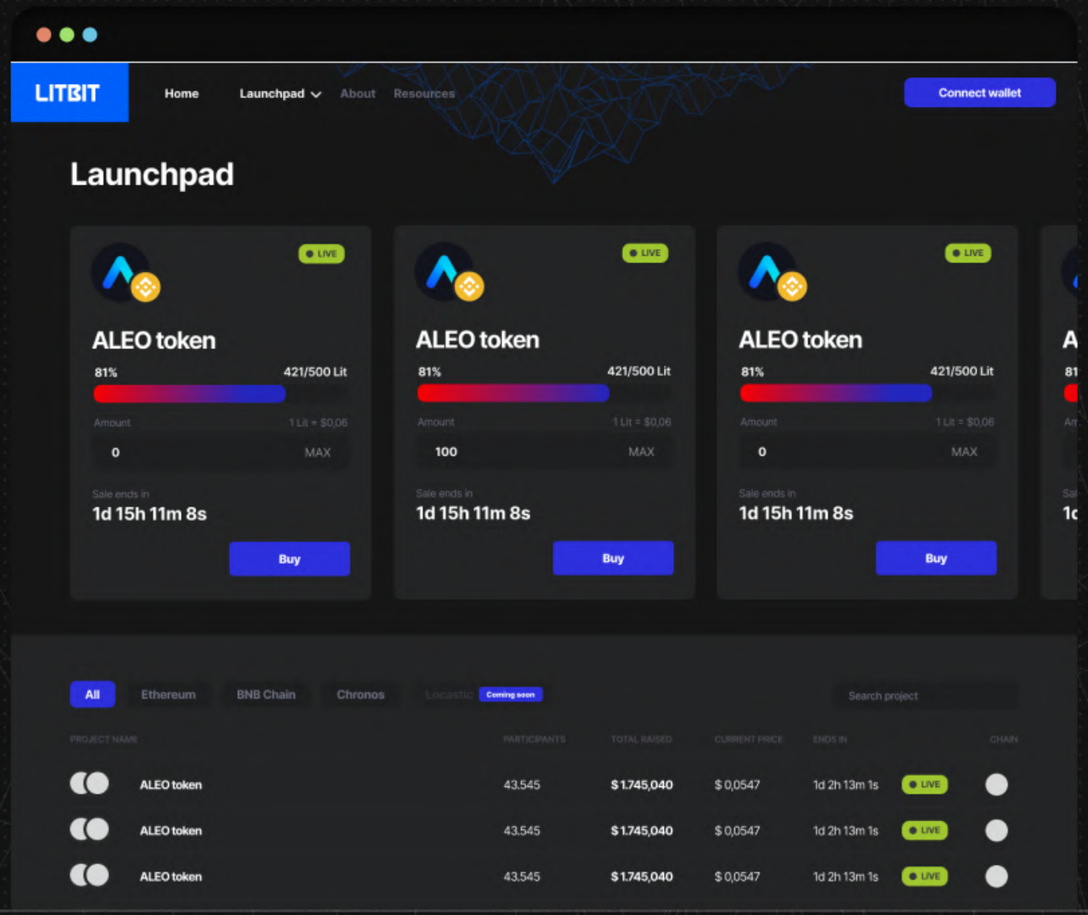
Decentralized Exchange Platform

The launchpad provides the opportunity for best projects and teams to raise investor fundsLottery anti-whale system; reduces monopoly and provides level playing field for everyone.



The elite launchpad for everyone.

- **The launchpad;** provides certain options for staking, farming, liquidity pool, token vaults.
- **Litbit Incubator**; scouts promising Blockchain startups and companies.
- **NFT Marketplace;** connecting 3D artists with LitBit's community-driven sustainable ecosystem.



Music NFT Marketplace (NDA)

Decentralized Blockchain platform that allows talented artists and their supporters to earn revenue for their work. So, instead of record labels taking most of the profits, we are also giving the community a chance to support their favourite artists through Open-source smart contract that ensure fair and transparent deals between involved parties.

Ultimately, the platform provides a new revenue stream for artists, granting the monetization opportunities for their artwork, but also, it provides a way for their fans/community to provide financial support and eventually gain an additional income source.

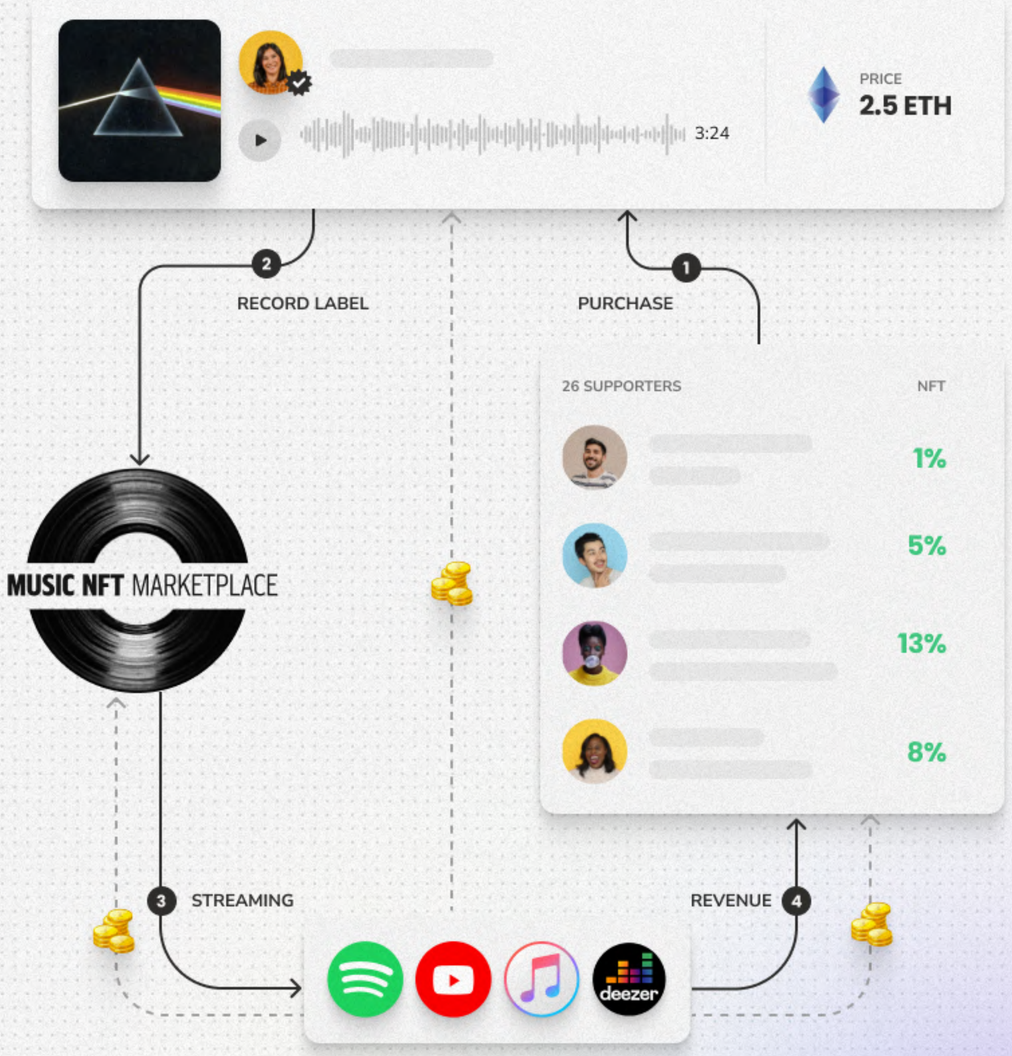
How does it work?

1. The artist presents the song on our Platform and then it's split into NFTs. Fans and supporters are able to buy the NFTs and become part-owners.

2. **The platform** operates as a record label and make sure that all of the tracks end up on streaming platforms like Youtube, Deezer, Spotify. NFT owners are earning royalties from the song.

3. NFTs can be bought and sold. Royalty privilege is transferred together with the NFT.

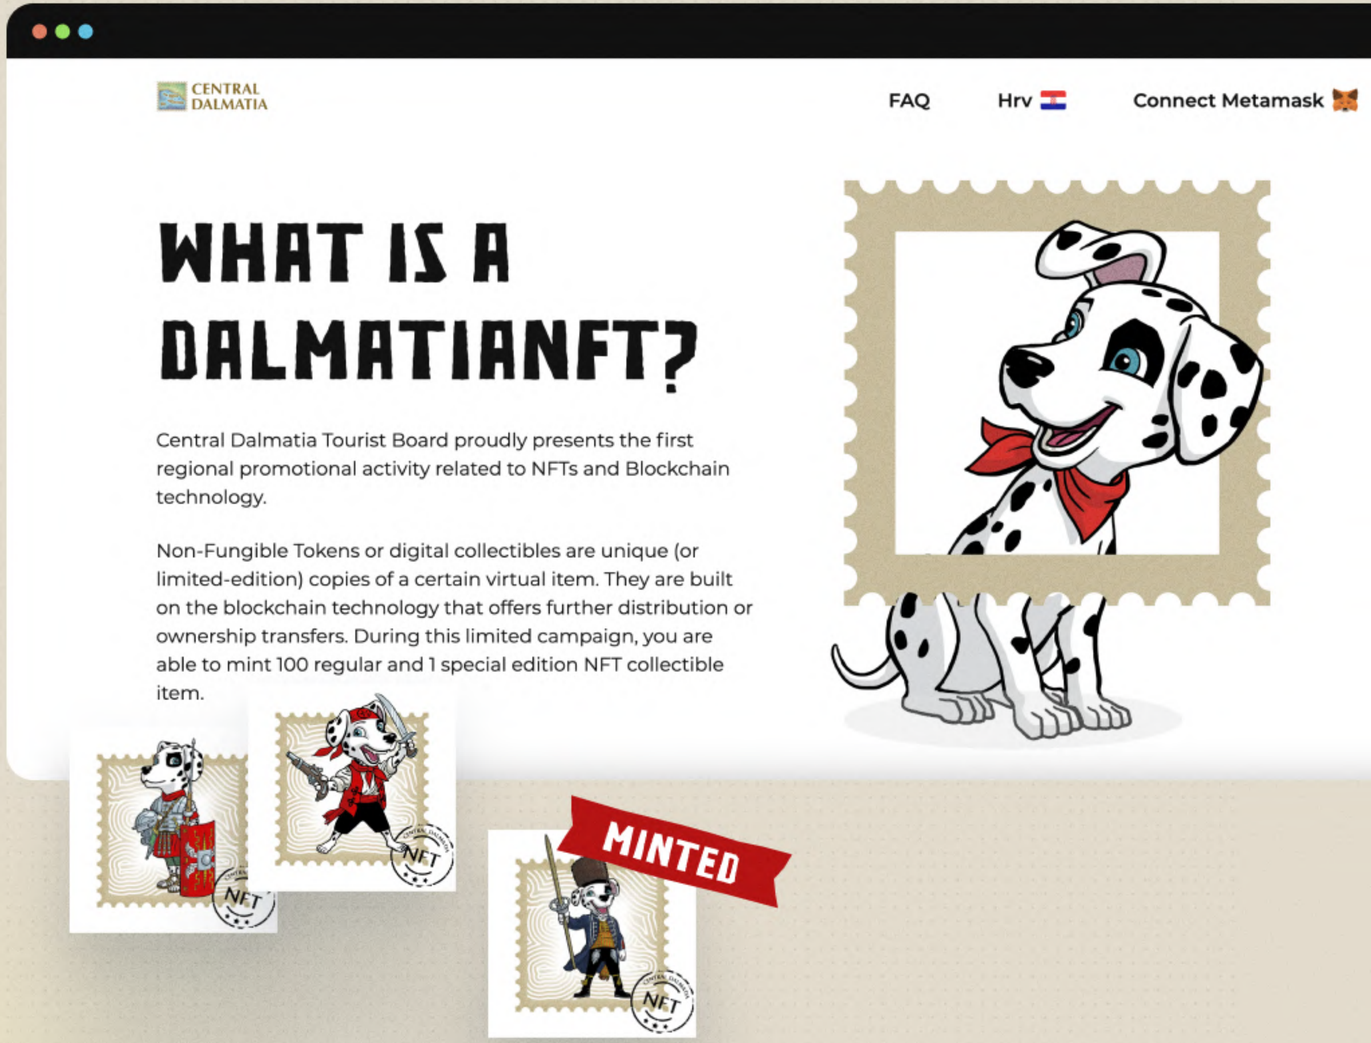
4. Once the artwork starts gaining revenue, it will be distributed towards the artists, NFT owners (supporters) and the platform itself.



DALMATIANFT

NFT Unique Souvenirs

Unique souvenirs for the visitors of a festival or event in general in such a way that they will receive a digital postcard or a souvenir in their cryptocurrency wallet, as a memento of attending that location. Postcards and souvenirs are going into the digital domain and there are mechanisms and technologies that support this, one of them is NFT.



Diocletian’s Palace replica in Metaverse

Aside from the NFT campaign for the Croatian Tourist Board, we were in charge of recreating this historical monument in the Sandbox world.

CORVUS PAY

A safe online payment gateway

Payment gateways impact the efficiency of any webshop they need to offer a safe, quick, and easy-to-use payment system. In this project, we designed a brand new interface for Corvus Pay. Aside from creating the UI design, the goal was to deliver an intuitive User Experience flow, leading the user to the final destination - the payment itself.

> *Locastic's input was crucial for our digital and visual transformation.*
